

Marker Light, Three-Function (Helmet-Mounted)

HEL STAR 5®

HEL-STAR 5® is a three-function, waterproof LED marker light designed specifically for low profile mounting on helmets. The three operating modes are user-defined in any combination of white, green or IR—either steady or flashing. Other usages include vehicle, equipment, or outerwear marking. The low profile design installs easily with Velcro® interfaces.

Made in the USA

HEL-STAR 5® Advantages

- **Safety**—Low profile design. Velcro attachment provides an emergency break-away feature.
- **Security**—Sliding switches provide visual, tactile confirmation of ON/OFF status and operating mode.
- **Versatility**—Three user-defined functions in any combination of White, Green, IR (flashing or steady)
- **Operation**—Field-replaceable lithium C123 cell provides long life, good cold temperature operation.
- **Experience**—Five years of experience in the field has resulted in a significantly improved, robust design.

HEL-STAR 5® Models

Currently available HEL-STAR 5 models are listed below. New models will be offered as user requirements are defined. A two-function HEL-STAR 4 model is also available.
