

Modular Airborne Weapons Case

The Modular Airborne Weapons Case (MAWC) is intended for use by static line parachutists and serves to secure the soldier's weapons and auxiliary equipment.

The unique adjustability feature allows the case to be used by all parachutists. In addition to the weapon itself, the internal compartment accommodates auxiliary equipment such as a Hooligan Tool, bi-pod, tri-pod, ammo and optics.

FEATURES & BENEFITS

- USASOC Approved
- Easy to maintain
- Highly adjustable
- Heavily reinforced
- Two sizes accommodate 99% of hand-held weapons, including the Carl Gustav
- Small case accommodates M4 to M249 with standard butt stock (31"-41.5")
- Large case accommodates M249 to M107 with 29" barrel (40"-56.5")

US Patent #US 8,490,788 B2
