Dear CPS/valued customer,

01 November 2006

Re: 365 Day Parachute Repack Cycle:

Uninsured United Parachute Technologies LLC. has no objection to use of a 365 Day Parachute Repack Cycle for Vector SOV Systems to benefit the reduction of excessive packing wear and tear on the fabrics that make up the harness and container system. The 365 day repack cycle should only be in effect while the system is kept in a controlled environment.

We would like to stipulate that the harness container system undergo a visual inspection for wear and tear every 6 months (182 days) to verify airworthiness and the general condition of the harness container components. The system should also undergo a visual inspection before each use If you have any questions please feel free to contact us.

Yours truly,

Mark Procos

General Manager
uninsured United Parachute Technologies LLC.
