

BACKGROUND

The Parachutist Navigation Board (Heated Version) is a light weight navigation platform that indicates GPS position (when used with an optional GPS device), and direction of travel during High Altitude High Opening (HAHO) parachute operations.

FEATURES

Specific features of the Parachutist Navigation Board (Heated Version) include:

- A Floating Ball Compass features a white face and bold black lettering for ease of viewing during night operations.
- The Ball Compass features a red LED back light that can be operated at high or low power and can accommodate a Backup Chem Light.
- Features a multi-adjustable, articulating front plate for mounting the Board to the operator on the chest strap, or on top of the front mounter ruck.
- All components can be easily manipulated with gloved hands.
- A heated GPS storage box protects the GPS unit from freezing at extreme cold temperatures and is capable of accommodating handheld GPS units up to 3.25" W x 6.25" H.
- A MA2-30 housing adapter provides a means for storing and using back-up Chem Lights (sold separately).
- A MA2-30 standard Military Altimeter features a red backlight for night operations.
- The Red LED backlight serves as a visual indicator of heater function. When the LED backlight turns off, the heater will also turn off shortly thereafter.

SPECIFICATIONS

Dimensions

Height 8.8 in
Width 9.7 in

Temperature Range

-60° F to + 130° F

Altitude Range

Maximum 35,000 ft (10,668 m)
